

Final Project Presentations & Wrap-up

Learning Objectives

- Present final projects effectively
- Peer review and feedback
- Course reflection and assessment
- Next steps in Python/data science journey
- Building a professional portfolio

Session Structure

1. **Project Presentations** (60 minutes)

- 5-7 minutes per student presentation
- Q&A and feedback session
- Peer evaluation

2. **Course Reflection** (20 minutes)

- Key takeaways and learnings
- Challenges overcome
- Skills developed

3. **Next Steps** (15 minutes)

- Advanced topics to explore
- Professional development resources
- Building a data science portfolio

4. **Course Wrap-up** (5 minutes)

- Final thoughts and feedback
- Certificate distribution
- Contact information for continued learning

Presentation Guidelines

- Keep presentations concise and focused
- Highlight key findings and insights
- Show your code and methodology
- Discuss challenges and solutions
- Share lessons learned

Resources for Continued Learning

- Advanced Python courses

- Specialized data science tracks
- Open source project contributions
- Professional networking and communities
